

ARTGATE AT “CHINA MEETS NORTH RHINE-WESTPHALIA” A congress hosted by Rheinische Post, 15.-16.9.16

Press release, 15th October 2016

A key area of ARTGATE’s work is the development of intercultural art concepts in exchange with emerging art markets like China. At the China congress hosted by the Rheinische Post media group this September, ARTGATE took the opportunity to introduce its Sino-German art services to the assembled German and Chinese corporations and institutions based in North Rhine-Westphalia.

Since its founding in 2013, ARTGATE Consulting has connected the German and Chinese art scene through tailor-made delegation visits. Over 150 Chinese entrepreneurs, art lovers and professionals as well as interested parties were able to get to know each other in person through the means of specially-crafted art consultancy programmes undertaken in North Rhine-Westphalia and Berlin. Numerous prestigious German corporate and private collections as well as state museums have supported and collaborated with our programmes.

At the Sino-German intersection, our event team conceives and realizes symposia, conventions, exhibitions or festive occasions for the intensification of the German-Chinese exchange in the art field, with the goal of connecting mutual cultural appreciation and business in a pleasant way. We support our national and international clients when it comes to specific purchases for art investments, the establishment of art collections, or the disposition of art works. Our deep understanding of the art markets in China and Germany enables us to expertly advise customers according to their individual needs.

For our commitment, ARTGATE Consulting was nominated for the “Needle of the Medici”, an award for cultural engagement alongside the Rhine-Ruhr trail created in honour of Anna Maria Luisa de’ Medici.
